

Veriket Classification

Identify, label and classify sensitive data at scale.

OVERVIEW

Automatically identify, label and classify sensitive data at scale — turning unstructured content into governed, policy-ready information that powers DLP and proves compliance.

KEY CAPABILITIES

- **Automated classification**
Identify and label sensitive files across the estate, at scale.
- **200+ file formats**
Documents, spreadsheets, images, archives and email.
- **Persistent labels**
Classification travels with the file across systems.
- **Flexible labeling**
Manual, automatic and suggested labels; visual and metadata tags.
- **Policy-driven rules**
Keywords, regex, data patterns and document fingerprints.
- **DLP & discovery synergy**
Drives Verikor decisions and Veriket Discovery scans.
