

Veriket Discovery

Scan and locate sensitive data across every system.

OVERVIEW

Scan and locate sensitive data across every system — structured and unstructured — to build a complete, continuously updated map of where your risk actually lives.

KEY CAPABILITIES

- **Estate-wide scanning**
Endpoints, servers, shares, databases and cloud repositories.
- **Structured & unstructured**
Files and databases scanned with one engine.
- **Sensitive-data catalog**
A full map of where sensitive data is stored and flows.
- **Risk visibility**
Exposure, location and ownership at a glance.
- **Remediation-ready**
Feeds classification and DLP with actionable findings.
- **Scheduled & incremental**
Continuous, low-impact scans keep the map current.
