

## Verikor DLP

Stop sensitive data from leaving — endpoint, network & cloud.

### OVERVIEW

Classification-driven Data Loss Prevention that monitors, controls and blocks sensitive data movement in real time — across endpoint, network and cloud, with context-aware policies and audit-ready evidence.

### KEY CAPABILITIES

- **Multi-channel coverage**  
Email, web, USB, print, cloud sync and SMB shares — one endpoint agent.
- **Context-aware policy engine**  
Labels combined with user, device and destination; 250+ templates.
- **Channel-specific actions**  
Allow, warn, block, encrypt or require justification per channel.
- **Endpoint offline OCR**  
Sensitive text in 200+ file formats and images — no OCR server.
- **Fingerprinting & incidents**  
Document fingerprints turned into workflow-ready incidents.
- **SIEM & audit evidence**  
Splunk, QRadar, Sentinel, Elastic; audit-ready compliance reports.
