

## BUSINESS CONTINUITY POLICY

This policy has been prepared to draw the basic framework and explain the principles necessary for the implementation, operation and continuous improvement of a business continuity management structure compatible with the business continuity needs and priorities of Siberson Bilişim Güvenliđi A.Ş.

- Ensuring life safety as the first priority in disasters and emergencies,
- To maintain our reputation as a reputable and solid company that our customers trust and therefore prefer,
- Establishing, operating and continuously improving our business continuity structure, taking into account the expectations of relevant parties and legal and regulatory obligations,
- Finding and implementing preventive and protective measures before the disaster strikes,
- To implement our business continuity capacity in line with the requirements of the ISO 22301 standard and to continuously improve it according to the practices of the ISO 22301 standard,
- To determine the necessary measurable targets for our business continuity structure to meet expectations and go further and to evaluate them annually,
- Conducting business impact analysis to determine priority activities that support our products and services,
- To make preparations to protect and save the priority activities determined in the business impact analysis,
- Conducting regular drills with realistic scenarios to ensure that our plans work in emergency situations,
- We are committed to ensuring and improving business continuity with the established control infrastructure.
