

QUALITY POLICY

- Determining our goals and objectives, regular monitoring and continuous improvement,
- Focusing on customer satisfaction in all our activities,
- To ensure compliance with all legal and other requirements that are our national and international obligations,
- Focus on creating value for all our stakeholders by using environmentally friendly technology to facilitate society's access to healthier and more comfortable living spaces,
- To use the four cornerstones of production: human, machine, material and method, in the most efficient way, to follow changes, to make continuous improvements, to plan our work by foreseeing risks and opportunities,
- To work to become an exemplary business in our sector with the sustainable management model we have created by evaluating quality, environment, occupational health and safety issues together,
- Continuously measuring customer satisfaction in our after-sales services, knowing their needs and expectations and solving customer demands clearly, transparently and quickly,
- To provide the resources necessary for our activities,

We commit and declare it as our quality policy.
